SUMMARY

Front-End Developer with 3+ years of experience designing and shipping production React and Next.js applications including freelance projects. Built and maintained 10+ reusable, accessible UI components, cut page load times by up to 50% through Next.js performance optimization, and shipped secure authentication and role-based access flows using TypeScript, Tailwind CSS, and Supabase. Comfortable owning features end-to-end from design handoff to production deployment in fast-moving, early-stage teams.

EXPERIENCE

Bizzmarrow Technologies — Frontend Engineer *Jul 2025 – Aug 2026*

- Spearheaded the migration of a legacy customer platform to Next.js (App Router) and TypeScript, optimization of Core Web Vitals, and cutting initial page load times by 42%.
- Architected a real-time data sync pipeline using Supabase WebSockets, enabling instant UI updates across the main dashboard and reducing API latency by 35%.
- Designed a global state and caching strategy using TanStack Query, reducing redundant database reads and lowering Supabase project compute costs by 20%.

Malic Movies Company — Frontend Developer *Jun 2023 – May 2025*

- Developed and launched 8+ highly responsive e-commerce and SaaS features using React and TypeScript, ensuring strict compliance with WCAG 2.1 AA web accessibility guidelines.
- Reduced page load time by 50% through Next.js performance optimization (image optimization, code-splitting, caching), directly improving user experience and organic search performance.
- Implemented secure user authentication flows and multi-tenant row-level security (RLS) policies using Supabase Auth, safely managing data for active users.
- Authored 120+ comprehensive unit and end-to-end testing suites using vitest and testing library, raising total front-end code test coverage from 55% to 85%.

PROJECTS

Docolab – Real-Time Collaborative Document Editor | *Next.js, TypeScript, Tailwind CSS, Supabase, TipTap, Yjs* | *Live Demo · GitHub*

- Built a real-time collaborative editor with live multi-user syncing (TipTap, Yjs, Supabase Realtime), comments, and image uploads.
- Enforced owner/editor/viewer roles with Supabase Row Level Security; added Gemini summarization with per-user rate limits.
- Wrote 76 automated tests (Vitest, Testing Library) and a GitHub Actions pipeline running lint, tests, and build on every pull request.

Tenhive - Full-Stack E-Commerce Platform | *Next.js, TypeScript, Tailwind CSS, Supabase* | *Live Demo · GitHub*

- Built a responsive, full-featured e-commerce application covering product browsing, cart management, and Paystack-powered checkout.
- Implemented secure user authentication and account management with Supabase, enabling personalized shopping experiences and order tracking.
- Built a full-featured admin panel for managing products, orders, and users.

DocSlot - Healthcare Appointment Management System | *Next.js, TypeScript, Tailwind CSS, Supabase* | *Live Demo · GitHub*

- Built a real-time availability management system designed to handle high-volume scheduling, instantly reflecting changes across the platform.
- Implemented appointment scheduling validation logic to prevent double bookings and ensure accurate time-slot availability for patients and providers.
- Built a centralized dashboard for monitoring and managing clinic schedules, and implemented role-based authentication and protected routes for secure, differentiated access for patients and administrators.

SKILLS

Front-End Development: HTML, CSS, Tailwind CSS, JavaScript, TypeScript, React, Next.js

State & Data: React Hooks, TanStack Query, Zustand, REST APIs, Zod, Drizzle ORM, TipTap, Yjs

Testing & Tooling: Vitest, Testing Library, Figma, VS Code, Chrome DevTools

Deployment & Collaboration: Supabase, Git, GitHub, GitHub Actions CI/CD, Vercel, Agile/Scrum workflows, Jira/Notion

Quality & Accessibility: Responsive design, cross-browser compatibility, Web Accessibility (WCAG basics), Core Web Vitals / performance optimization

EDUCATION

Bachelor of Science in Computer Science, Ebonyi State University *2018 – 2022*
